

Emerging Challenges of Serving Ohio's Children with Special Health Care Needs

Appendix

<u>Page(s)</u>	<u>Content</u>
A2-A3	Variable list
A4	Guide to tables and abbreviations
A5-A8	Table A1.1 Comparison of children with special health care needs vs. children without special health care needs (ages 0-18 years old)
A9-A12	Table A1.2 Comparison of young adults with special health care needs vs. young adults without special health care needs (ages 19-25 years old)
A13-A16	Table A1.3 Comparison of children with special health care needs with Medicaid vs. without Medicaid (ages 0-18 years old)
A17	Table A2 Weighted distributions of children with special health care needs: The 2012 OMAS vs the 2010 National Survey of Children with Special Health Care Needs (NS-CSHCN)
A18-A21	Table A3.1 Comparison of children with special health care needs (age 0-17 years old): The 2008 OFHS vs. the 2012 OMAS
A22-A25	Table A3.2 Comparison of children with special health care needs with Medicaid (ages 0-17 years old): The 2008 OFHS vs. the 2012 OMAS
A26	Table A4.1 Health care differences among children with special health care needs compared to children without special health care needs: Adjusted odds ratios from the 2008 OFHS and the 2012 OMAS
A27	Table A4.2 Association with unmet health care needs, health care utilization and health status among children with special health care needs lacking care consistent with a medical home: Adjusted odds ratios from the 2012 OMAS
A28	Table A4.3 Differences in unmet health care needs and health care utilization among children with special health care needs with different levels of complex needs: Adjusted odds ratios from the 2008 OFHS and the 2012 OMAS
A29	Table A4.4 Characteristics associated with various barriers to care and unmet needs among children with special health care needs: Adjusted odds ratios from the 2012 OMAS

2012 Variable List

Variable	SAS variable name in public use data		Comments
	Child version	Adult version	
Gender	p148_imp	s15_imp	Some values imputed by the OMAS staff.
Age	i90a_imp	s14_imp	Some values imputed by the OMAS staff.
Race/Ethnicity	race5_c_rec_imp	race5_a_rec_imp	Some values constructed by the OMAS staff.
Parent/Legal guardian's marital status	marital	marital	Used i90b_rec to limit findings to parents/legal guardians.
Parent/Legal guardian's education	educ_imp	educ_imp	Some values imputed by the OMAS staff. Used i90b_rec to limit findings to parents/legal guardians.
Medicaid Managed Care Region	MedicaidRegion	MedicaidRegion	
Family income (% of the FPL)	h87_imp	h87_imp	Derived variable constructed by the OMAS staff.
Health insurance	i_type_c_imp	i_type_a_imp	Derived variable constructed by the OMAS staff.
Medicaid vs. non-Medicaid	medicd_c_imp	medicd_a_imp	Some variables imputed by OMAS. Used for analyses comparing CSHCN with Medicaid.
Medical home	mhlevel_c	mhlevel_a	Derived variable constructed by the OMAS staff; see text for description.
Usual source of care	usual_c	usual_a	
Level of complexity of need	[not available]	[not available]	Variable was constructed from L126a through L126n; see text for description.
Currently has diabetes	LAS5	D43	
Currently has asthma	LAS1b	[not available]	Variable was recoded to include skip pattern from LAS1a.
Has unmet dental needs	O139	f68	
Has unmet prescription needs	O140	f68b	
Has other unmet needs	O141	[not used]	
Care is harder to get compared to three years ago	O144	f69	

2012 Variable List

Variable	SAS variable name in public use data		Comments
	Child version	Adult version	
Received enough help coordinating child health care	J108b	[not available]	Derived variable constructed by the OMAS staff.
Number of emergency room visits in past year	M134	E62	
Any well-child visit/check-up in past year	M130	E59Adays	
Any hospital stay in past year	M132	E60	
Any dental visit in past year	M135days	E63days	
General health status	L125_imp	d30_imp	Some values imputed by the OMAS staff.
Vision health status	LAS13	d30a2	
Dental health status	LAS14	d30a1	
Special health care needs status	shcn_c	shcn_a	Derived variable was constructed by the OMAS staff using multiple variables; see text for description.
Small or big problem to see specialist	K4Q26	[not used]	Variables were recoded to include skip patterns from K4Q24 and K4Q25.
County type	region	region	

NOTES: Additional information about the imputed or constructed variables can be found elsewhere. For the comparison analysis, variable names in 2008 may differ from variable names in 2012. Variable names/categories in the national dataset (NS-CSHCN) may also differ.

Guide to Tables

- (a) "Unweighted N" refers to how many cases are in the sample.
- (b) "Weighted N" refers to the estimated number of people in Ohio with this characteristic.
- (c) "Weighted Distribution" refers to the estimate of the percent (%) of CSHCN (or YASHCN) who have this characteristic. The denominator includes individuals who have missing or incomplete data on the CSHCN status.
- (d) "Weighted Prevalence" refers to the percent (%) of all children with this characteristic who are CSHCN (or YASHCN). The denominator includes people with missing or incomplete data.
- (e) Examples of "Other" health insurance includes Medicare and privately purchased plans.

Abbreviations

AOR = adjusted odds ratio

CI = confidence interval

CSHCN = children with special health care needs

df = degrees of freedom

FPL = federal poverty level

GED = General Educational Development

NS-CSHCN = National Survey - Children with Special Health Care Needs

OFHS = Ohio Family Health Survey

OMAS = Ohio Medicaid Assessment Survey

PCMH = patient-centered medical home

SHCN = special health care needs

YASHCN = young adults (19-25 years old) with special health care needs

Table A1.1 Comparison of children with special health care needs vs. children without special health care needs (ages 0-18 years old)

Notes: This sample is limited to children age 0-17 years to maintain comparability. Weighted distribution percentages may not total 100% because of missing or incomplete data.

[†]Because the NS-CSHCN only surveyed children with special health care needs, we cannot accurately estimate the overall proportion of the population who are CSHCN in comparison to children without special health care needs. Instead, population data from the 2010 US Census is used to construct crude weighted estimates without confidence intervals.

Table A3.1 Comparison of children with special health care needs (age 0-17 years old): The 2008 OFHS vs. the 2012 OMAS

Fair/Poor dental health status among children ages 3 and older	<i>not available in 2008</i>		2.52*	(1.85 - 3.45)	--	--
Any well-child visit in past year	1.12	(0.97 - 1.29)	1.22	(0.96 - 1.54)	--	--
Any dental visit in past year	0.79	(0.61 - 1.03)	1.18	(0.87 - 1.59)	--	--
Any emergency room visit in past year	2.36*	(2.05 - 2.71)	2.45*	(2.01 - 2.99)	0.33	0.76
Any hospital stay in past year	3.28*	(2.65 - 4.07)	2.90*	(2.12 - 3.97)	-0.64	0.52
Has any unmet prescription needs	4.08*	(3.07 - 5.42)	4.12*	(2.67 - 6.35)	0.04	0.80
Has unmet dental needs among children ages 3 or older	1.76*	(1.37 - 2.26)	1.93*	(1.32 - 2.81)	0.39	0.74
Has other unmet needs	3.56*	(2.63 - 4.80)	4.85*	(3.27 - 7.18)	1.23	0.38
Care is harder to get compared to three years ago among children ages 3 or older (vs. easier or same)	1.96*	(1.66 - 2.31)	1.70*	(1.31 - 2.21)	-0.90	0.37

Notes : Models are adjusted for age, gender, race/ethnicity, household income (% of the FPL), health insurance, and county type. This sample is limited to 0-17 year-olds and data are weighted to be representative of the state of Ohio.

*Indicates a significant result ($p<0.01$)

♦ A two-sample Z-test is used to assess whether the odds ratios for each variable differ by year. Z-scores are only calculated for significant results.

Table A4.2 Association with unmet health care needs, health care utilization and health status among children with special health care needs lacking care consistent with a medical home: Adjusted odds ratios from the 2012 OMAS

Children with special health care needs (CSHCN)		
	AOR	95% CI
Fair/Poor general health status ^ξ	0.70	(0.43 - 1.15)
Fair/Poor vision health status among children ages 5 or older	0.87	(0.47 - 1.63)
Fair/Poor dental health status among children ages 3 or older	1.44	(0.87 - 2.38)
Any dental visit in past year	0.62	(0.36 - 1.07)
Any emergency room visit in past year	0.94	(0.68 - 1.30)
Any hospital stay in past year	0.83	(0.51 - 1.33)
Has any unmet prescription needs	1.08	(0.59 - 1.96)
Has unmet dental needs	1.55	(0.85 - 2.83)
Has other unmet needs	1.41	(0.77 - 2.61)
Care is harder to get compared to three years ago among children ages 3 or older (vs. easier or same)	2.06*	(1.27 - 3.34)

Notes : Models are adjusted for age, gender, race/ethnicity, household income (% of the FPL), health insurance, general health status, and level of complexity of need. This sample includes 0-18 year olds, and data are weighted to be representative of the state of Ohio.

^ξThe "Fair/Poor general health status" model omits the general health status variable as an independent variable for this analysis.

*Indicates a significant result ($p<0.01$)
